

# Toolbars

While toolbars can be really convenient, they sometimes take up a lot of room that could be used to view a larger part of the 1 graph.

You can temporarily cause the toolbars to disappear, allowing you to see more of the graph. Simply click on the vertical "handles" circled in red above to cause the toolbars to disappear.

Notice that the "handles" are now horizontal and the toolbars have been temporarily removed. To have the toolbars to reappear, simply click on the "handles" again. The toolbars will come back and the "handles" will be in their customary vertical alignment.
